EXPERIENCE/PROYECTS

DeuSens (2026)

Intership training as a software developer using the Godot engine

Developing an interactive table, implementing functionalities and collaborating with the team following development methodologies.

Into the Depths (2026)

Individual 2D video game vertical slice developed individually in Unity as a Final Degree Project.

The project focuses on an indirect escort mechanic, where the player guides an autonomous robot without controlling it directly, solving puzzles and overcoming obstacles.

Private Tutor (2022- 2024)

Private math and english lessons for Bachillerato and ESO students.
Developing communication and problem-solving skills

EDUCATION

Bachelor's Degree in Video Game Design and Development

UNIR Universidad Internacional de la Rioja

2022 - 2026

Bachillerato in Science and Technology

IES La Laboral, Logroño, La Rioja

2016 - 2018

LANGUAGES

Inglés - C1 (Cambridge, 2018)

Continuous presence in academic and technical environments, with strong competence in oral and written communication. Reinforced by experience teaching private math and English lessons to ESO and Bachillerato students.
